

Philadelphia ALA Mobile Roundtable 11/6/2025

Threat Landscape

- Humans are weakest link
- Personal device intimacy
- Trust Curiosity Urgency
- Phishing/Smishing mobile attacks increasing
- Advances in AI technology – Voice attacks
- Lost/Stolen, Unvetted Apps, Weak Passwords

Impact to Firm

- Damaged reputation – loss of trust
- Confidential and client data breached - espionage
- Legal and financial repercussions

Best Practices

- Implement MDM (Mobile Device Management)
- Encryption/Patch/Password/Monitoring/Remote wipe
- Training/Acceptable Use
- Authentication (Multi-Factor, Biometric)
- Restricted Access (Geo-fencing, RBAC)

Public Wi-Fi Risks

- No encryption
- Man in the middle attacks
- Fake hotspots
- Session hijacking

- Choose Cellular over Public Wi-Fi (personal hotspot)
- Turn off Auto Join/File/Print Sharing
- Keep devices updated
- Look for the padlock on websites
- Forget network after use

iPhone

- Keep IOS Updated
- Auto-brightness or dim
- Use Secure Wi-fi, disable cellular
 - Airplane mode if low cell signal
 - Security
- Battery Usage Information (Settings>Battery)
 - Background Activity (Settings > General > Background App Refresh and select Wi-Fi, Wi-Fi & Cellular Data, or Off to turn off Background App Refresh entirely.)
 - Mail App Fetch Manually
- Location Services Off (Settings > Privacy > Location Services)
- Home/Lock Screen Notifications (Settings > Notifications)
- Low Power Mode

Batteries - Maximizing Performance - Apple

Android

Take care of your battery

Use the power adapter that came with your phone

Keep it cool

Charge as much or as little as needed

Stretch a low battery

Turn on battery saver or low power mode

Turn on battery saver mode manually

Avoid actions that keep the screen on

Avoid constant internet connection

Avoid actions that process too much information

Limit connectivity & location
